

Crizac Limited

Asset-light B2B international student recruitment platform connecting 15,000+ agents with 400+ global universities across 85+ source countries and 8 destinations. NSE: CRIZAC | BSE: 544439.

Prepared: 06 July 2026

Price: Rs 199 (03 Jul close)

Market cap: Rs 3,481 cr

FY26 audited base

Summary of the 13-page research pack

FY26 REVENUE

1,042.2

Rs cr, up 22.7% YoY; 41% four-year CAGR

FY26 EBITDA

282.4

Rs cr; margin 27.1% (FY25: 25.1%)

FY26 PAT / ROCE

219.2

Rs cr; EPS 12.52; ROCE ~42.9-48.6%

LEVERAGE

~Nil

Borrowings Rs 1.75 cr vs equity Rs 592.4 cr

Executive Verdict

Business quality: a credible, high-return platform - 27.1% EBITDA margin, ~43-49% ROCE, near-zero debt, positive FCF (Rs 127 cr) and near-zero working-capital days. FY26 execution was strong. But the growth engine has a quality question: applications grew 43% while enrolments grew only 13.8%, conversion fell from 7.9% to 6.3%, ~97% of destination revenue is UK-exposed, and FY27 guidance was deferred.

Valuation: the pack's two methods disagree by 85%. The DCF (Rs 148.46) is justified as a conservative base case - its 24% margin is management's own sustainable band and its growth taper matches the conversion evidence. The CCM's Rs 245-280 is not defensible: it prices Crizac at IndiaMART's multiple while neutralising the only true peer (IDP at 5.2x EBITDA) and applying no discount for concentration, track record or moat. Triangulated fair value: **Rs 150-185, centre ~Rs 165**.

Stance at Rs 199: fairly-to-fully priced - the market already pays for partial bull-case delivery (needs WACC 13% or 32% margins to justify). Fresh purchase requires either a lower entry or FY27 proof of the five monitorables on page 11.

FAIR-VALUE BAND

Rs 150-185

DCF-weighted triangulation; centre ~Rs 165

DCF VALUE

Rs 148

Conservative floor; 8.5x implied FY26 EV/EBITDA

CCM BAND (REJECTED)

Rs 245-280

Method flaws; usable only as bull-case reference

MARKET AT RS 199

11.9x

FY26 EV/EBITDA - between IDP 5.2x and platforms 16x

Structurally Attractive, Now Compliance-Led

International student mobility (7.3m+ globally mobile students) remains a long-duration theme, but the easy volume-growth phase is over. Destination governments now manage inflows, visa quality, post-study rights and agent conduct - policy determines conversion more than raw demand.

GLOBAL MOBILE STUDENTS

From 14.8L in 2023 (F&S/DRHP, ~7.8% CAGR)

Destination Policy Scan (verified 03-06 July 2026)

DESTINATION	LATEST VERIFIED NUMBER	DIRECTION	SIGNAL FOR CRIZAC
United Kingdom	685,565 students 2024/25; 409,954 sponsored visas YE Mar-26	Large but tighter; sponsor-quality regime	Core corridor (~97% of destination mix). BCA thresholds rising 5pp; graduate route cut to 18 months; Agent Quality Framework incoming.
Canada	437,000 study permits 2025; 2026 stabilised at that level	Managed volume, PGWP tightened	Diversification capped in pace; quality cohorts still viable.
Australia	2026 planning level ~295,000 new enrolments; visa fee up from Jul-26	Managed growth	Compliance raises the value of screening; entry not unconstrained.
United States	1.18m international students; visa interview/vetting friction	Large, policy-sensitive	Brand pull strong, conversion timing uncertain.
Europe ex-UK	Germany ~420k; France 412k; Ireland 44.5k (+10.2%)	Growing / diversification pool	Meaningful redirection option; needs country-specific counselling and language/course fit.

Why the Industry Still Works

- Aspiration demand from India, Asia, Africa, LATAM; students switch destination rather than abandon plans.
- Universities need diversified, quality-screened pipelines - aggregators earn commission for compliant enrolments.
- Fragmented sourcing rewards platforms with verified agent networks and institution trust.

What Changed

- Volume growth replaced by compliance-led growth: caps, refusal thresholds, sponsor metrics, agent scrutiny.
- Conversion quality, not application count, is the monetisation metric.
- Policy shocks are destination-specific - concentration is the key vulnerability.

Industry verdict: attractive sector with real aggregator economics, but the winners will be trusted compliance-and-conversion platforms that can redirect demand across corridors. For a ~97% UK-exposed player, destination policy is the single largest external driver of value.

Recruitment Infrastructure, Not a Consumer Platform

Crizac monetises the agent-to-university funnel: application processing, matching, compliance screening and enrolment-linked commissions. It is a value-shop intermediary - management itself cautions against comparing it with high-operating-leverage consumer platforms.

AGENT NETWORK

15,000+

5,389 active in FY26 (+36.5%)

UNIVERSITY PARTNERS

400+

198 catered in FY26; top-10 = 66% of revenue

REACH

85+ / 8

Source countries / destination countries

APPLICATIONS FY26

3.94L

Processed across the platform, +43% YoY

Portfolio View (BCG Lens)

Star	Core B2B agent-university platform - revenue, agents, institutions all scaling.
Cash cow	Mature UK corridor and long-tenure relationships (20+ of top-30 universities >5 years).
Question marks	B2C (Global Tree), EduMentor AI, LATAM (StudiesPlanet), New Zealand - economics unproven.
Avoid	Low-quality application volume - burns processing capacity and university trust.

Five Forces (Condensed)

Rivalry	High	ApplyBoard, IDP, Leverage, Leap, direct university channels.
Buyer power	Med-High	Universities negotiate commissions; can go direct.
Supplier power	Med-High	Top universities and productive agents hold leverage.
Substitutes	Medium	Domestic/online degrees, direct applications, pathways.
Entry barriers	Medium	Low locally; high at contracted, multi-country scale.

The Moat, Honestly Stated

- **Real strengths:** scaled verified agent base, long university tenures, application-processing infrastructure, capital-light 43-49% ROCE economics, low sourcing concentration (top-10 agents only ~10% of revenue).
- **Structural caveats:** no exclusivity with universities or agents (Q2/Q3 concalls); most universities use multiple platforms; cost of services scales with revenue (commissions), so margins are commission-intermediation, not software; gross-margin gains in FY26 were partly GBP/INR.
- **Read-through:** the moat is service quality and relationship history, not lock-in - it must be re-earned through conversion and compliance every intake cycle.

Model verdict: differentiated at scale and financially resilient, but the "platform" label overstates operating leverage. Valuation should treat Crizac as a high-return intermediation franchise with policy-cyclical volumes - which is exactly where the CCM note goes wrong (page 8).

Strong P&L, Clean Balance Sheet, One Cash-Flow Asterisk

FY26 audited consolidated results. Scale did not dilute margins; the balance sheet is liquid and nearly debt-free. The asterisk is operating cash flow, which lagged profit growth - explained, but needing FY27 proof.

Operating Trend (Rs cr)

PARTICULARS	FY22	FY23	FY24	FY25	FY26	READ
Revenue from operations	263.5	473.0	634.9	849.5	1,042.2	+22.7% YoY; ~41% CAGR
EBITDA	-	107.3	72.6	212.8	282.4	FY24 dip = elevated other expenses
EBITDA margin	-	22.7%	11.4%	25.1%	27.1%	Cost of services 70.5% → 67.5% of revenue
PAT / EPS (FY26)	PAT 219.2 margin ~20.5%			EPS 12.52		P/E at Rs 199 = ~15.9x

Other income fell to Rs 28.96 cr - the FY26 print is operations-led, not treasury-led. Q4 gross-margin improvement was attributed substantially to GBP/INR movement (Q4 concall).

Balance Sheet (FY26)

Total equity	592.4	NCI appeared post-acquisitions
Borrowings	1.75	D/E ~0.003x; finance cost Rs 0.07 cr
Cash + bank + investments	196.0	135.5 + 29.5 + 31.0
Trade receivables	238.5	Down from 256.4 despite growth
Trade payables	233.6	Agent payout follows university collection
Watch items	194.5	Goodwill 24.4 (up) + other current fin. assets 170.1 (jumped) - note-level review

Cash Flow (FY26)

Operating cash flow	144.1	vs 187.3 in FY25 despite higher PBT 287.2
CFO / EBITDA	56%	Moderated by Rs 55 cr one-off termination fee
Free cash flow	127.2	CFO less capex/intangibles 16.9
Investing CF	+24.3	FD maturities + interest > capex + acquisitions
Financing CF	-151.1	Dividend 140.0 + borrowing repayment
Closing cash	135.5	Rose even after the large dividend

ROE
37.2%
Investor-presentation basis

ROCE
48.6%
IP basis; ~42.9% derived (EBIT/closing CE)

NWC DAYS
1.7
Receivable days 83.5 (from 110.2)

IPO CONTEXT
Pure OFS
Jul-25, Rs 860 cr at Rs 245; no fresh capital

Financial verdict: high-growth, high-return, low-leverage - better cash quality than most IPO growth stories. Because the IPO was entirely offer-for-sale, the thesis must rest on organic cash generation. The FY27 proof point: operating cash flow tracking PAT again (>80% CFO/EBITDA ex one-offs).

The Funnel Is Scaling Faster Than It Converts

The single most important operating finding of the pack: top-of-funnel metrics (applications, agents) are growing far faster than the monetisation metric (enrolments). Management's mix explanation is plausible - and unproven.

APPLICATIONS

3.94L

+43% YoY - strong demand capture

ENROLMENTS

24,697

+13.8% YoY - the monetisation metric

CONVERSION

6.3%

Analytical ratio, down from 7.9% (-1.6pp)

REVENUE / ENROLMENT

Rs 4.22L

+7.8% - partly offsets weaker conversion

Funnel and Productivity Detail

METRIC	FY24	FY25	FY26	READ-THROUGH
Applications processed	262,502	275,897	394,629	One student may file 2-3 applications; 6-9 month lead to intake
Student enrolments	NA	~21,702	24,697	FY25 inferred from disclosed +13.8% growth
Active agents	2,532	3,948	5,389	Network scaling; registered base 15,000+
Applications / active agent	103.7	69.9	73.2	Modest recovery after FY25 dilution
Enrolments / active agent	NA	5.5	4.6	Weakened - new agents add applications, not yet students
Mgmt source-market conversion	India ~10% China/LATAM ~20% Africa ~5%			Blended ~14% (Q4); mix shift dilutes the analytical ratio

Working-Capital Discipline

METRIC	FY24	FY25	FY26	READ-THROUGH
Receivable days	96.5	110.2	83.5	Material improvement; needs ageing-level proof
Payable days (on cost of services)	106.8	158.7	121.2	Natural offset: agents paid after university collects
Net working-capital days	21.7	-1.8	1.7	Near-zero operating cycle - the model's best feature

Working

Application scale, agent additions, revenue per enrolment up 7.8%, receivable days down 26.7, NWC ~zero.

Not yet proven

Enrolment growth 3x slower than applications; conversion down 1.6pp; enrolments per agent 5.5 → 4.6.

Can hurt

Top-10 universities = 66% of revenue; non-exclusive agents; low-quality volume damaging trust and collections.

Execution-Positive, Governance-Sensitive

Founder-led and promoter-controlled. Capability and alignment are strengths; control concentration and a young listed-company track record are the watch items.

PROMOTER HOLDING

79.94%

Mar-26 shareholding; 100% pre-IPO

CAPABILITY

Strong

Founder-operators run strategy, finance, relationships

MANAGEMENT DEPTH

Improving

COO/CTO/CMO/CBO/UK-CEO + CPMO added Jun-26

GOVERNANCE RISK

Med-High

Control concentration; RPT discipline to prove

Who Runs Crizac

PERSON	ROLE	ASSESSMENT
Dr. Vikash Agarwal	Chairman & MD (promoter)	Core execution strength; also key-person dependence - institution and agent relationships run through him.
Manish Agarwal	Whole-Time Director & CFO (promoter)	Long-tenured promoter finance leadership; comfort depends on disclosure and related-party discipline.
Pinky Agarwal	Non-Executive Director (promoter)	OFS seller alongside Manish Agarwal - promoter monetisation context, not a standalone negative.
Nikhil Jain	Chief Product & Marketing Officer (announced 15 Jun 2026)	ForeignAdmits founder; professionalisation signal - real operating influence to be monitored.

Governance Positives

- Three independent directors incl. an independent woman director; audit/NRC/risk committees disclosed.
- Second-line leadership visible across operations, technology, marketing, compliance and UK.
- Q4 call showed willingness to discuss uncertainty; no contradictory board-change filings found.

Governance Watch Items

- 79.94% control limits minority influence; board effectiveness must be proven in decisions.
- Related-party transactions (incl. promoter-group office leases) need ongoing monitoring.
- Key-person risk on the two executive promoters; watch pledges, sales, KMP turnover.

Promoter/management verdict: strong on capability, moderate on governance comfort, medium-high on control risk. For minority shareholders the reliance is on promoter conduct, independent-director effectiveness and clean disclosures - all still building a track record.

Ten Flags, Three of Them High-Severity

The concalls reveal a profitable, debt-free business that is still heavily exposed to policy, conversion and disclosure risks. These flags bear directly on what multiple the business deserves.

RED FLAG	SEVERITY	ESSENCE AND EVIDENCE
1. UK destination concentration	High	~97% of destination mix (Q4 Q&A); management targets <60% within two years - a very large promised shift with high execution risk.
2. Visa / sponsor compliance	High	UK BCA thresholds rising 5pp (enrolment 95%, completion 90%); refusal threshold moved 10% → 5%. Crizac says it is "way below" - but a partner university entering an action plan would hit disproportionately.
3. Applications ≠ enrolments	High	+43% applications vs +14% enrolments; geography-mix explanation (India ~10%, China/LATAM ~20%, Africa ~5%) is plausible but makes application growth a weak KPI.
4. Enrolment disclosure	Medium	Early-FY26 calls withheld enrolment numbers as "sensitive"; Q4 improved but organic-vs-acquired, country conversion and per-student revenue splits still missing.
5. Cash conversion	Medium	Q2 OCF negative; FY26 CFO/EBITDA 56% before adjusting the Rs 55 cr termination fee; revenue recognition precedes university payment.
6. No contractual lock-in	Medium	No exclusivity with universities or agents (Q2); most universities use multiple platforms (Q3). The moat is service quality, not contract.
7. Margin scalability	Medium	Commissions scale with revenue; sustainable EBITDA margin discussed at 24-25%; Q4 gross-margin gain substantially FX-driven.
8. Acquisition-led diversification	Medium	StudiesPlanet, Global Tree, EduMentor, Medway/NZ - strategy sensible, but no clean organic-vs-acquired bridge yet.
9. FY27 guidance deferred	Medium	Earlier calls spoke of 20-30% growth; Q4 deferred firm guidance citing geopolitics and conversion visibility. Tone change matters.
10. Reporting discipline	Watch	Q2 slide inconsistencies acknowledged; CFO lacked cash-flow detail on follow-ups. Not a fraud signal - a maturity signal.

External Policy Triangulation

UK white paper: sponsor-compliance metrics up 5pp, Graduate Route cut to 18 months, Agent Quality Framework mandatory for sponsors using overseas agents. Canada: 437k permit cap and PGWP tightening. Australia: 295k managed planning level. US: visa-interview pauses and expanded vetting. Every diversification corridor is itself policy-managed - which is why the red-flags report concludes the business **"should not be valued as a clean, diversified, high-moat platform unless the next few quarters prove otherwise."**

CCM Says Rs 245-280 - The Number Does Not Survive Scrutiny

The CCM note applies blended EV/Revenue (40%) and EV/EBITDA (60%) multiples from IDP Education, IndiaMART and Info Edge to Crizac's FY26 financials. Arithmetic verified exact; the peer logic is where it fails.

CRIZAC TRADING AT RS 199

11.9x

FY26 EV/EBITDA; 3.21x EV/Revenue;
EV Rs 3,347 cr

CCM MEAN RESULT

Rs 248

CCM MEDIAN RESULT

Rs 278

Peer-median multiples, 60/40 blend

SELECTED BAND

Rs 245-280

"Supported by the IPO-price reference"

Peer Set (market data 06 Jul 2026; EV = m-cap + debt - cash/investments)

COMPANY	EV/REVENUE	EV/EBITDA	COMPARABILITY ASSESSMENT
IDP Education (A\$; FY25)	0.90x	5.19x	The only true student-placement peer - in a policy-led downcycle that mirrors Crizac's dominant risk.
IndiaMART (Rs cr; FY26)	4.84x	15.98x	B2B marketplace proxy - subscription economics, decade-listed, diversified. Not education.
Info Edge (Rs cr; FY26)	7.44x	20.86x	Platform proxy with dominant Naukri moat; EV adjusted for Rs 42,299 cr investments. Not education.
Peer mean / median	4.39x / 4.84x	14.01x / 15.98x	Just Dial reviewed and excluded (EV distorted by cash; stale annuals).
Bridge to value (mean median)	EV 3,957-5,043 + net cash 134 Rs 248 Rs 278 per share (17.5 cr shares)		

Judgment: Not Defensible as Fair Value - Four Structural Flaws

1. The median IS IndiaMART	With three peers, the median row on both metrics is literally IndiaMART. "Rs 278" = rating an 11-month-listed microcap with ~97% UK concentration, 66% top-10-university revenue and no exclusivity at a moated franchise's multiple.
2. True peer neutralised	IDP (0.90x / 5.19x) implies Rs 61-91. Setting it aside as a "downturn" discards the base-rate evidence of exactly the policy risk Crizac concentrates. Keeping only the marketplace proxies guarantees a high answer.
3. Zero comparability discount	The note's own "why imperfect / when to discount further" list is never applied. Standard discount for this size/history/ concentration gap: 30-40%.
4. Circular IPO anchor	Rs 245 was the promoters' OFS ask price - a seller's number the stock has traded below since listing. Using it as "support" anchors the conclusion to the thing being tested.

A coherent CCM from the same peers: IDP-anchored with a growth/margin premium (8-10x EBITDA) gives Rs 140-170; platform multiples less a 30-35% discount give Rs 176-183. Both converge on the DCF band - not on Rs 245-280.

DCF Says Rs 148.46 - Conservative, Coherent, Verified

Seven-year explicit FCFF (FY27E-FY33E) + Gordon terminal, mid-year convention, 25.17% tax. Rebuilt independently: every output replicates the workbook to the paisa.

WACC

Projection Summary (Rs cr)

PARTICULARS	FY27E	FY28E	FY29E	FY30E	FY31E	FY32E	FY33E
Revenue	1,229.7	1,426.5	1,626.2	1,821.4	2,003.5	2,163.8	2,293.6
EBITDA (24%)	295.1	342.4	390.3	437.1	480.8	519.3	550.5
FCFF	196.6	234.7	267.8	300.2	330.5	357.3	379.2
PV of FCFF @16.26%	182.3	187.2	183.7	177.2	167.8	156.0	142.4

D&A 2.5%, capex 2.0%, NWC 1.0% of revenue. Equity bridge: PV explicit 1,196.7 + PV terminal 1,208.1 (TV = 394.3 / 12.26%) = EV 2,404.7; + cash/bank/investments 196.0 - debt 1.8 = equity 2,599.0; ÷ 17.5064 cr shares = **Rs 148.46**. Implied FY26 multiples: 8.5x EV/EBITDA, 2.31x EV/Revenue.

Sensitivity - WACC × Terminal g (corrected grid)

G \ WACC	15.26%	16.26%	17.26%
3.0%	154	143	133
4.0%	161	148	138
5.0%	170	155	143

Whole plausible box: Rs 133-170. Rate assumptions alone cannot reach the traded price.

Scenario Ladder (Rs/share)

Bear (margin 22%, growth -4pp/yr)	114
Base as modelled	148
Margin 25.5% + CSP trimmed to 1%	171
FY26 margin 27.1% held / no CSP	168 / 176

Defensible DCF band **Rs 148-175**; balanced centre Rs 160-170.

Judgment: Justified, With Three Non-Fatal Critiques

(i) **Conservatism stacking** - margin haircut + growth taper + 2% company-specific premium charges some risk twice; beta 1.0 (light for a policy-cyclical name) partially offsets. (ii) Terminal capex 2.0% < D&A 2.5% - a growing perpetuity should not depreciate more than it invests (~Rs 2.5/share). (iii) Housekeeping: broken sensitivity-grid corner references in the workbook; equity bridge (Rs 196 cr) not harmonised with the CCM's Rs 134 cr. Read the base as a floor, not a midpoint.

The DCF Earns Its Number; the CCM Asserts Its Number

An 85% spread between the pack's own methods (Rs 148 vs Rs 278) means at least one is wrong. Reverse-engineering the market price shows which.

Side by Side

PARAMETER	DCF	CCM NOTE	MARKET (03 JUL)
Value per share	Rs 148.46	Rs 245-280	Rs 199
Implied FY26 EV/EBITDA	8.5x	14.0-16.0x	11.9x
Implied FY26 EV/Revenue	2.31x	4.4-4.8x	3.21x
Stance vs price	-25%	+23% to +41%	-

What Each Price Level Requires (reverse-DCF, one lever at a time)

PRICE	REQUIRED ASSUMPTION VS DCF BASE	PLAUSIBILITY
Rs 148	24% margin, 11.9% CAGR, WACC 16.26% - the modelled base.	Floor
Rs 165	Margin ~25.5% with CSP trimmed to 1%.	Balanced
Rs 199	WACC 13.02%, or margin 32.1%, or +6.6pp growth every year (FY27 ~25%).	Full price
Rs 245	IPO-price zone; needs FY26 margins plus high-teens growth to persist for years.	Needs proof
Rs 278	WACC 10.39% or sustained margin 44.8%.	Indefensible

Market-Coherence Check

- Rs 199 = 11.9x EBITDA: a 26% discount to the platform median (15.98x) and 2.3x the direct peer IDP (5.19x).
- That is the right intermediate rating for a concentrated, newly-listed, policy-exposed but fast-growing platform.
- The market is applying precisely the discount the CCM refused; the gap to Rs 245-280 reflects the CCM's anchoring, not mispricing.

Final View

- Weighting:** DCF 75-80%; discounted-CCM cross-check 20-25%; published CCM band 0%.
- Fair value:** ~Rs 150-185, centre near Rs 165.
- At Rs 199:** fairly-to-fully priced; no margin of safety on conservative assumptions.

A Show-Me Story With a High-Quality Engine

The business earns its returns; the stock already pays for part of the promise. The FY27 print decides which scenario governs.

Bull (toward Rs 200-230+)

- UK mix falls visibly without margin reset; Europe/NZ corridors scale organically.
- Conversion stabilises; enrolments per agent recover toward 5.5.
- Margins hold 26-27%; CFO/EBITDA >80%; guidance reinstated.

Base (Rs 150-185)

- Growth mid-teens, margin ~24-25.5% as management guides.
- Diversification progresses slowly; policy stays tight but stable.
- Stock compounds with earnings, not re-rating.

Bear (toward Rs 115-135)

- UK sponsor regime bites a key partner; conversion keeps falling.
- Margin reverts to 22% on mix and compliance cost.
- Receivables stretch; acquisitions mask organic softness.

The Five Monitorables That Decide the Re-Rating

MONITORABLE	GOOD SIGNAL	RED-FLAG TRIGGER
UK destination mix	Visibly below ~90% and falling toward the <60% target	Above 90% after two more quarters, or non-UK growth mainly acquired
Conversion (apps → enrolments)	Stabilises at/above 6.3%; enrolment growth closes the gap	Applications +30%+ while enrolments stay below +15%
Cash conversion	CFO/EBITDA >80% ex one-offs; receivable days ≤83.5	Below 70% for another year excluding one-offs
Organic vs acquired bridge	Clean revenue/EBITDA split for the four FY26 deals	No split disclosed; margin gains explained by FX or bonuses
FY27 guidance	Reinstated with country and conversion assumptions	Remains deferred, or given without assumptions

Two or three printing positively would justify migrating the fair band toward Rs 200-230; all five would begin to legitimise the CCM's Rs 245+ zone. None have printed yet.

Bottom Line

Crizac is a genuinely high-return, capital-light platform with strong FY26 delivery - and a valuation debate that resolves clearly: **fair value ~Rs 150-185 today**. At Rs 199 the market has already advanced credit for partial bull-case delivery. Buy the proof, not the promise: entries below the mid-Rs 160s offer a margin of safety; above Rs 200, returns depend on the monitorables printing. (Educational analysis, not investment advice.)

Sources and Audit Trail

This executive report condenses the 13-page Crizac research pack v2 (executive summaries, seven detailed reports, CCM and DCF valuations, and the valuation verdict) without altering any underlying figure.

Company / Local Sources

- Prospectus dated 04 July 2025 (pure OFS, Rs 860 cr at Rs 245) and DRHP - restated financials, peer disclosure, risk factors.
- Audited FY26 consolidated results (Q4 FS) and Q4 investor presentation - FY26 P&L, balance sheet, cash flow, KPIs, ROE/ROCE.
- Q1-Q4 FY26 concall transcripts (05 Aug 2025; 16 Oct 2025; 28 Jan 2026; 25 May 2026) - UK mix ~97%, conversion by geography, sustainable margin 24-25%, no-exclusivity, guidance deferral.
- Local financial workbook (5-year compilation) - historical statements used as the DCF base.
- Crizac_CCM_Valuation workbook/HTML and Crizac_Limited_DCF_Valuation_Model_v1.xlsx - the two valuations under review.

Market / External Sources

- Screener - Crizac price Rs 199 / m-cap Rs 3,481 cr (03 Jul close); IndiaMART and Info Edge FY26 market and financial data (06 Jul 2026).

- CCIL yield curve (risk-free) and Damodaran data library (ERP) for the DCF cost of capital.

Verification Performed

Both valuation workbooks were rebuilt independently in Python: the DCF replicated to Rs 148.46 exactly (PV explicit 1,196.7; PV terminal 1,208.1; EV 2,404.7; equity 2,599.0) and the CCM to Rs 247.98 / Rs 277.66 exactly. The corrected WACCxg sensitivity grid, scenario ladder and reverse-DCF figures on pages 9-10 were computed from the same verified engine. Identified workbook defects (broken sensitivity corner references, terminal capex < D&A, unharmonised equity bridges, empty CCM sources sheet) are catalogued in the pack's Valuation Verdict section.

Basis and Limitations

Figures are in Rs crore unless stated; FY26 refers to the year ended 31 March 2026. Peer multiples reflect market data as at 03-06 July 2026 and will drift. The fair-value band (Rs 150-185) is an analytical triangulation, not a target price. Prepared by **CA Padarabind Pradhan**, Research Analyst (+91 84709 91453), 06 July 2026.
